

I'M
DR. KASSAM.

WELCOME TO
THE CLINIC.

UPMC | University of Pittsburgh
Medical Center
Minimally Invasive endoNeurosurgery Center

I'VE GOT SOME
GOOD NEWS
FOR YOU.

I know you don't want to be here.
I know you don't want to know me.

But the best thing that could happen
is to know me.

I've performed more than 3,000 neurosurgical procedures. More than 800 are what's called minimally invasive endoscopic procedures.

And I'm a person first. I'll be direct and treat you like a friend. Occasionally, I may even make you laugh.

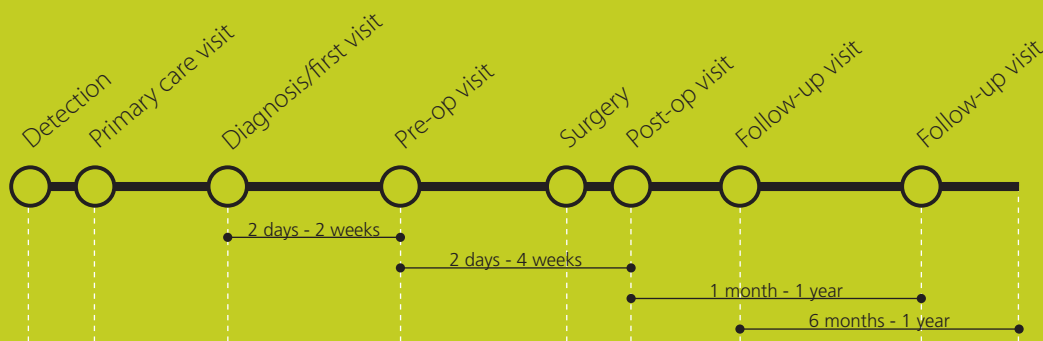

I'VE DEVELOPED AN APPROACH
THAT LOWERS CHANCE OF
SURGICAL COMPLICATIONS
AND GREATLY REDUCES
HOSPITAL STAY.

It's minimally invasive brain surgery through the nose. This requires no incisions and patients can often be discharged within two days.

Under my direction, the center has pioneered and developed much of the technology and instrumentation used during these surgeries. With continued research and experience, I now use this surgery for most tumors affecting the skull base.

I KNOW YOU'LL HAVE
QUESTIONS THROUGHOUT
YOUR JOURNEY.

I work with a great team, and could not do my job without them. They can answer a lot of your questions. Trust them as you trust me. We're here for you the whole way through.

My staff and I see a lot of patients,
and provide attention and care to
all. We know this sometimes leads to
backups. But I hope you'll understand
and trust I'll see you as soon as I can.

YOU'RE IN GOOD HANDS.

If you want to learn more about me or the clinic, visit the clinic's website. It has a lot of good information and videos.
